To Whom It May Concern:

Phil Jaderborg was responsible for our computer systems over a period of at least 8 years. He served as our "IT department" and successfully guided us through every stage of computer technology from assessment, to implementation and trouble-free maintenance. His extensive knowledge and experience combined with great service was a huge asset to our company!

Our computer system includes two main servers with 6 users including one off site user. We run many software programs including the Property Managment/Accounting Software Yardi Enterprise. Our extensive computer operations are very efficient and cost effective. We would certainly highly recommend Phil, he proved to be extremely reliable, conscientious, and knowledgeable.

Sincerely,

Nancy Law, Controller  
And The Wright and Company staff
